Tomaquag Museum Image Reproduction and Usage Fees

Requests to reproduce materials from the Tomaquag Museum collection will be only granted after filling out the Reproduction Request form. All reproduction requests are subject to condition of the material requested from the collection, existing restrictions, time restraints and will require prior approval before fulfilling each request.

The Tomaquag Museum is able to provide photocopies, digital scans and photography of cultural material in the collection. Reproduction of the collections is wholly dependent upon conservation and preservation concerns (which could be subject to restrictions and additional fees) and time processing the request.

Reproduction Services and Fees:

Photocopies (*Black and White*): \$1.50 per page
Photocopies (*Full Color*): \$3.50 per page

Photocopies are to be provided by the Archivist, who will determine beforehand whether or not the act of photocopying will cause damage to the material. If it is determined that photocopying could potentially cause even minimal damage, the photocopy request will be denied.

Digital Scanning: \$25 per image

As with photocopies, materials that are requested to be scanned will be determined beforehand by the Archivist whether or not the act of scanning will cause damage to the material. The default scanning resolution will be at 300 ppi (pixels per inch), unless requested otherwise. Depending on file size and type, the scans will either be delivered via email, file sharing service, external storage device (provided by purchaser or for an additional fee of \$15. In addition, the files can be burned to data disc for an additional \$3.50. Reproductions can also be mailed via USPS, but additional shipping and handling charges will be applied to your invoice. A shipping estimate will be provided prior to shipment.

New Photography: \$50/hr
